and Co-Organizer

EXPERIENCE

UI/UX Engineer, Presence   *May 2019 - Present*

- Simplified and reorganized the product's dashboard navigation to improve user's ability to find pages while utilizing Figma, AngularJS, TypeScript, and C#
- Audited product for web accessibility compliance following WCAG standards and applied improved practices using code
- Implemented responsive web design and development throughout the entire single-page application product
- Designed wireframes and interactive prototypes of the product as a mobile application before building it using Xamarin.Forms and XAML
- Provide dynamic, creative solutions using code to increase the performance and ease of use of Presence's web application

UI/UX Engineer (Contract), Werkberry   *August 2020 - Present*

- Design user interface elements for features determined in sprint
- Translate interactive mockups into code using Vue, TypeScript, and CSS
- Determine optimal interface solutions for users to complete a given task based on research
- Collaborate weekly as a team using Agile methodologies

Interaction Designer/Developer, Raymond James   *October 2017 - May 2019*

- Created and documented UI design system of reusable components for the redesign of the company's intranet system
- Strategized and implemented scalable, modern solutions for legacy web properties using JavaScript, Sass, Bootstrap, and additional libraries/frameworks
- Led concepting efforts for redesign of a major enterprise investment tool while collaborating with the development team to ensure proper implementation of concepts
- Concepted and implemented restructuring of 300+ legacy websites throughout the Raymond James and Associates brand
- Created interactive prototypes and journey maps showcasing optimal user experience based off of data garnered from surveys and reports

Designer & Web Developer, BLASTmedia Ventures   *January 2015 - May 2017*

- Designed wireframes and interactive mockups of responsive and cross-browser compatible websites for clients
- Managed design and development components of the conversion rate optimization team while utilizing Optimizely and Google Analytics for testing and measurement
- Developed responsive websites, digital solutions, and landing pages using JavaScript, CSS, HTML, WordPress, and PHP
- Oversaw distribution of client projects and workflow for the creative team
